Progress in analysis

:

- *Increasing Signal MC statistics ($\times 100$ of previous statistics)*
Produced 8,00,000 events for 4 decay modes(and 'cc' modes) by evtgen
(on 'bwg' server)
Simulating all events by gsim(20 jobs running, 4 jobs pending on 'afarm')

Next in the list

remove double counting from K_L modes

fix event by event comparison of the 2 solutions

Fix other coding issues(if any) and copy for 'cc' modes
